New Bamboo.

## Bamboo is the future of climate-conscious furniture making.

Our bamboo species  
*Dendrocalamus Asper*:

- matures in only 5 years<sup>1</sup>
- sequesters high amounts of CO<sub>2</sub>
- needs to be harvested  
to provide root energy to new sprouts  
to keep CO<sub>2</sub> stored
- possesses a high surface density.

<sup>1</sup> Trees need min. 30 - 40 years to mature.

**Pring Studio** designs and produces contemporary bamboo furniture with a **technical approach**, applying the same precision and standards as in solid woodwork.

Our innovative double-plank structure and advancements in the treatment process, transport bamboo into a new era. This **new bamboo** allows us to create slim and dynamic structures that are highly durable.

The **Kidul stacking chair** presents a light and dynamic aesthetic, carefully balanced by a comforting backrest. With the added stackability it complements private homes, as well as F&B and hospitality projects.

Our double-plank structure enables slender linear shapes, while preserving the natural curviness of bamboo. Ten-on-mortise joints ensure great strength and form a visual highlight, with the dotted end grain sticking through the linear fibres.

**Kidul** Stacking Chair

Kidul stacking chair at **Kopi Manyar**, Jakarta.

Goding Armchair

Dalem dining table and Kidul stacking chair at **J&N Residence**, Jakarta.

**Nagan** Bar Stool

**Siliran Stool**

# PRING

## GOOD DESIGN

- 'G-Mark' Award Japan 2023
- Good Design Indonesia Award 2023
- In-House Design Team

## CLIMATE FRIENDLY

- Fast Growth
- Sequesters high Amounts of CO2
- Must be harvested

## GERMAN QUALITY

- Own Factory & Treatment Facility
- Machine-based Carpentry

## MATERIAL INNOVATION

- Signature treatment
- Linear plank structures
- Refined joinery

## SOCIAL IMPACT

- Sourcing from small Households
- Supporting local Livelihoods

After 10 years of experimenting and designing with bamboo, we opened our **own factory and treatment facility**.

Producing entirely in-house allows us to control every step according to our quality standards and have close feedback loops between our design and product development team.

Pring Studio is based in Yogyakarta, Indonesia, one of the few regions in the world where the bamboo species *Dendrocalamus Asper* grows and a hub for Java's creative scene.

Our long term partner, Pak Antok, helps us to source bamboo from small households in the Gunung Kidul area in Yogyakarta.

Supporting local livelihoods.
